

MUSICAL CONCERT

Neel Sarkar Project

Neel Sarkar Project is a joint venture project between different musicians whose main aim is to find new ways of interpreting the traditional Hindustani music by working on it with jazz harmonics and rhythmic structures.

This is done by a flexible group of musicians out of which four of them form the heart of the project. It is a journey which invites musicians from all origins to join to find together new ambiances and ideas with the willingness to do it with simplicity, or to do more music with less instrumentation.

NSP believes music is a dialogue. It speaks, listens, interacts, gives birth and encourages new relationships. That's the reason why its music renews itself and evolves every time, the same way the words and speeches change with time and the audiences to which it is dedicated.
